Dear Hiring Manager

I am writing to express my sincere interest in the Laravel Developer position at Doh Eain. With a strong background in web development, a specialized focus on Laravel, and a passion for contributing to meaningful digital solutions, I am excited about the opportunity to join your team and help further your mission of creating more livable cities.

I hold a Higher National Diploma in Software Development and B.Sc in Business Information Technology (First Class Honours) from KMD Institute completed in 2019. During my academic projects, I learned to navigate the full development lifecycle—from gathering requirements and designing the architecture to developing, testing, and deploying applications. One of the most rewarding aspects of these projects was working with PHP to develop back-end systems that were both robust and efficient. I also worked with MySQL for database management and Bootstrap for creating responsive, mobile-friendly front-end interfaces.

After my graduation, I worked as a trainee in the SE department at KMD Institute, where I gained hands-on experience in working with different technologies, debugging, and troubleshooting for 3 months. Due to the pandemic and other circumstances, I have not been able to continue my career until now. However, I am eager to return to the workforce and apply my knowledge and skills.

I am particularly drawn to Doh Eain due to your mission of improving urban living through sustainable solutions. I share your commitment to using technology to create positive social impact, and I am excited about the prospect of contributing my skills to develop and maintain web platforms that serve your vision. I am confident that my technical skills and enthusiasm for the role will enable me to make a meaningful contribution to your team. In terms of salary expectations, I am seeking a monthly range of MMK 500,000 – MMK 1,000,000, though I am open to discussing this further depending on the specific responsibilities of the role and the overall benefits package.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills, experience, and enthusiasm align with the goals of Doh Eain. I attached my resume for your review, and I look forward to the opportunity to speak with you further.

Sincerely,

Kyawt No No Aung
